FULL PORTFOLIO

Security architect for generative AI at BBVA Corporate & Investment Banking since the bank's first AI project: security-by-design, risk assessment and audit of AI systems on AWS and Azure. Previously researched adversarial generative models against fingerprint authentication at UC3M (first author, ACM ARES 2023). I also build and maintain my own agent platform.

EXPERIENCE

AI Security Architect & IT Security Auditor

Feb 2024 – Present

BBVA · Corporate & Investment Banking · via Nfoque Advisory Services

- Security architect for generative AI at BBVA CIB since the bank's first AI project: security-by-design, risk assessment and review of AI architectures on AWS and Azure.
- Security audits and mitigation plans for critical banking systems under DORA, NIST and ISO 27001.
- Built internal automations that save an estimated 100,000 hours of work per year across CIB teams.

AI Researcher & Engineer · Guest Lecturer

Jul 2022 – Feb 2024

Universidad Carlos III de Madrid

- Generative adversarial networks that synthesise fingerprint patterns (MasterPrints), tested against Android capacitive sensors. First author, ACM ARES 2023.
- Designed and delivered AI-security training for INCIBE and the Spanish National Police.

Cybersecurity & Distributed Systems Analyst

Dec 2021 – Mar 2023

FUNDITEC

- Engineered secure distributed architectures and smart contracts for Horizon 2020 and NextGenerationEU projects (supply-chain and renewable-energy traceability, Gaia-X, Peppol).

Co-founder & IT Security Manager

Dec 2020 – Aug 2021

DFSocial Gaming · DecodedWorld

- Co-founder and head of IT security of DFSocial, the first DeFi gaming ecosystem (Ethereum, BNB Smart Chain). Peak market cap of \$16M; team of 16.

EDUCATION

Doctoral research, AI × Cybersecurity · UC3M

2022 – 2024 · paused

Thesis topic: the MasterPrint threat on Android capacitive sensors

MSc Cybersecurity · UC3M

2020 – 2021

Thesis: analytical tool for Advanced Persistent Threats using geopolitical data (GDELT)

BSc Computer Engineering · UC3M

2016 – 2020

Thesis: software for malicious macro detection

LANGUAGES

Spanish (native) · English (C1, professional) · French (A2)

Detailed experience, research and coursework: gmeleon.github.io/portfolio

SELECTED PROJECT

Hybrid Agentic Platform

Independent project

Agent platform for companies that runs across cloud and local infrastructure, built to reduce the cost of deploying agentic systems. 245+ technical and operational capabilities, each covered by tests.

RESEARCH

“Characterizing the MasterPrint threat on Android devices with capacitive sensors”

ACM ARES 2023 · First author

doi.org/10.1145/3600160.3600177

CONTINUOUS LEARNING

CMU 11-768 · AI Agents

ONGOING

Berkeley · Agentic AI

AI Security Bootcamp (AISB)

BlueDot · Technical AI Safety

Stanford CS224W · ML with Graphs

Stanford · Cryptography I

UIUC · Cloud Computing Concepts 1-2

Helsinki · Big Data Platforms

SKILLS

SECURITY

Security-by-design for GenAI & agents · Threat modelling & risk · Security audits · Adversarial ML · DORA · NIST · ISO 27001 · GDPR

AI & AGENTS

LLM agents & multi-agent systems · Hybrid cloud/local inference · RAG & tool use · GANs & neural networks · Process automation

PLATFORMS

AWS · Azure · Ethereum / BNB Chain · Smart contracts
